

ACCURACY

An Evaluation of Non-Instrumented Drug Test Devices

Substance Abuse and Mental Health
Services Administration (SAMSHA)
Division of Workplace Programs.

The purpose of this study (below) was to evaluate the performance of 15 point of collection drug test devices. The results were compared to the Syva EMIT assays run on a Behring Diagnostics ETS analyzer.

The Rapid Drug Screen® (RDS®) was ranked the **most accurate multi-drug device for all drugs** as compared to GC/MS. InCup utilizes the same tests as Rapid Drug Screen.
